

Pop Skulls Mafia NFT

Roadmap

500 MINTED

The web store will begin construction and start to be propagated with products. A special set of super rare NFTs will be created and dropped in a lottery fashion to holders. Specialty CAD artists will be hired to recreate NFTs into 3d wax prints for molding and casting. Accounts will be set up with specified jewelers and electronic equipment will be purchased for screens and medallion creation. Designs will be created and tested.

We will be giving out super rare NFTs to some of our holders as a thank you for joining us on this journey.

1500 MINTED

The store will open online. We will start by making NFTs into rings in gold and silver. We will also be making bracelets of NFTs and necklace medallions. Electronic screens embedded in gold and silver to sell to our whale friends.

2000 MINTED

A token will be made by using "the diamond". Diamond tokens will be given out to holders as profit sharing. Holders will also make more diamond tokens for referring sales. Tokens can be used toward the purchase of NFT jewelry at a discounted rate for holders. At this point, the store will enter the metaverse where holders can come and show off recent designs. We will want to make these designs accessible to wear in the metaverse as soon as the graphics are able to handle it.

3500 MINTED

When all are sold out, holders will be thanked again with custom-made jewelry possibly a one-of-a-kind membership ring. We will then gain brick and mortar locations and expand into other forms of jewelry and luxury goods. At this time another NFT collection will be created, and all members will be whitelisted or given free NFTs. Diamond tokens will continue to be distributed to holders quarterly as profit sharing. This is a long-term idea, we are creating a corporation based on NFTs as a Kickstarter and then used as a form of stock to distribute dividends. Holders are owners and can be a salesman at the same time. Gaining
